

CAPSTONE PROJECT - THE POSSIBLE COVID-19 OUTBREAK DISTRICTS IN SEATTLE

Xiaohang Zhang

INTRODUCTION

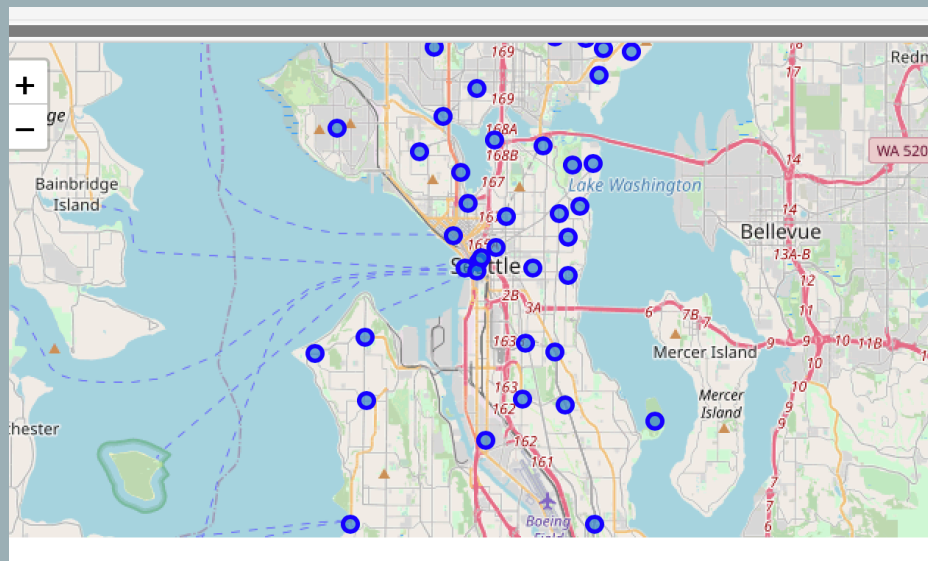

DATA

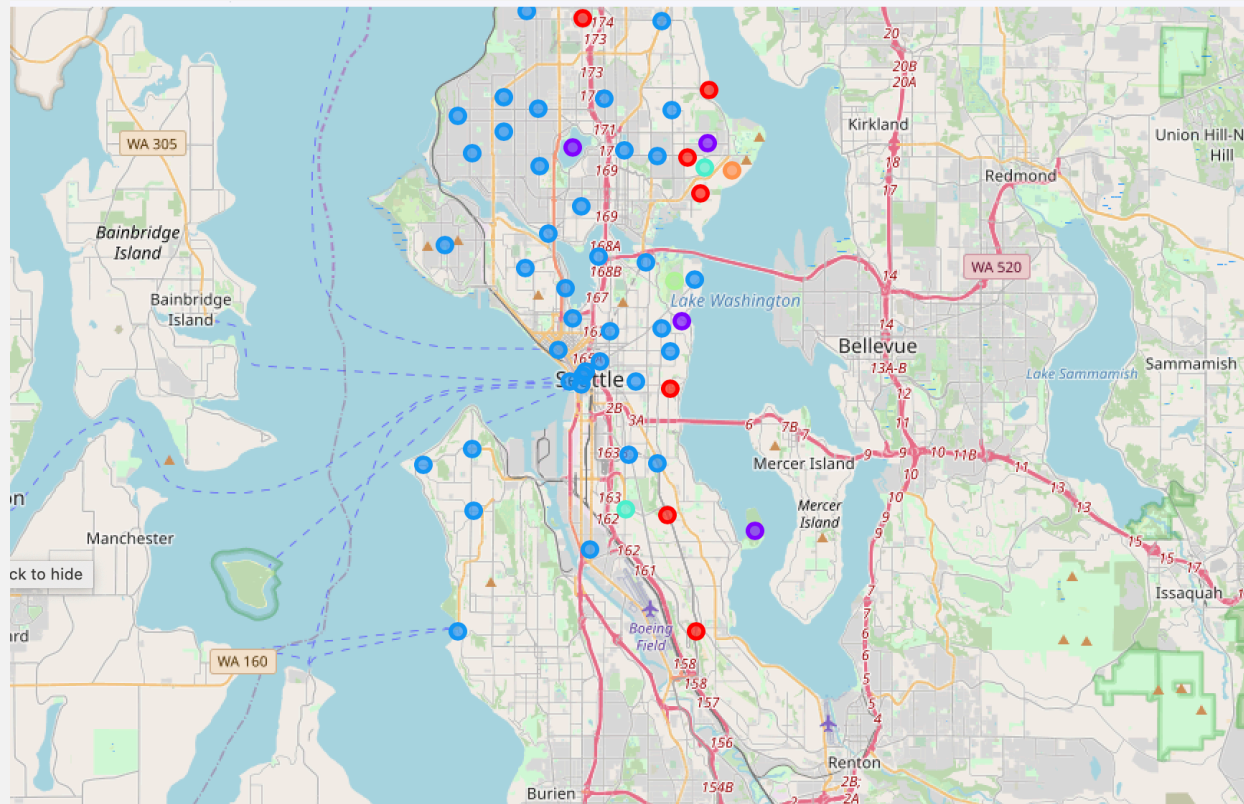

GENERATE COORDINATE FOR ALL DISTRICTS

	district	neighborhood	Latitude	Longitude
0	Belltown	Central Seattle	47.613231	-122.345361
1	Broadmoor	Central Seattle	47.635170	-122.289711
2	Capitol Hill	Central Seattle	47.619004	-122.320215
3	Central District	Central Seattle	47.603110	-122.308270
4	Denny-Blaine	Central Seattle	47.622327	-122.285985
5	Downtown	Central Seattle	47.604949	-122.333274
6	Eastlake	Central Seattle	47.643145	-122.326172
7	First Hill	Central Seattle	47.609305	-122.324984
8	International District	Central Seattle	47.602896	-122.339841
9	Leschi	Central Seattle	47.600535	-122.291866
10	Madison Park	Central Seattle	47.635930	-122.280196
11	Madison Valley	Central Seattle	47.619916	-122.295614
12	Madrona	Central Seattle	47.612792	-122.291226

MAP SEATTLE

CLUSTERING

RESULT

5. Results

The resulting clusters are as follow :

- Cluster 1 - low probability district
- Cluster 2 - low probability district
- Cluster 3 - High probability district
- Cluster 4 - moderate probability district
- Cluster 5 - low probability district
- Cluster 6 - low probability district

CONCLUSION

- From the result, Cluster 3 has the most density of cafe shop and restaurants **Therefore, Cluster 3 has the highest potential to have the covid-19 outbreak.**
